Sequence 4, Application US/09891823

Publication No. US20020110566A1

GENERAL INFORMATION:
APPLICANT: Neefe, John R.
APPLICANT: Hour, Leslie J.
APPLICANT: Winnett, Mark T.
APPLICANT: Goldstone, Stephen E.
APPLICANT: Siegel, Marvin
TITLE OF INVENTION: HUMAN PAPILLOMA VIRUS TREATMENT
FILE REFERENCE: 12071-003001
CURRENT APPLICATION NUMBER: US/09/891,823
CURRENT FILING DATE: 2001-10-19
PRIOR APPLICATION NUMBER: US 60/214,202
PRIOR APPLICATION NUMBER: US 60/214,202
PRIOR APPLICATION NUMBER: US 60/214,202
PRIOR APPLICATION SOS: 140
SOFTWARE: FastSEQ for Windows Version 4.0

 Pred. No. is the number of results predicted by chance to have a
score greater than or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            B B
